Select a Template for your first project, In that select scrum

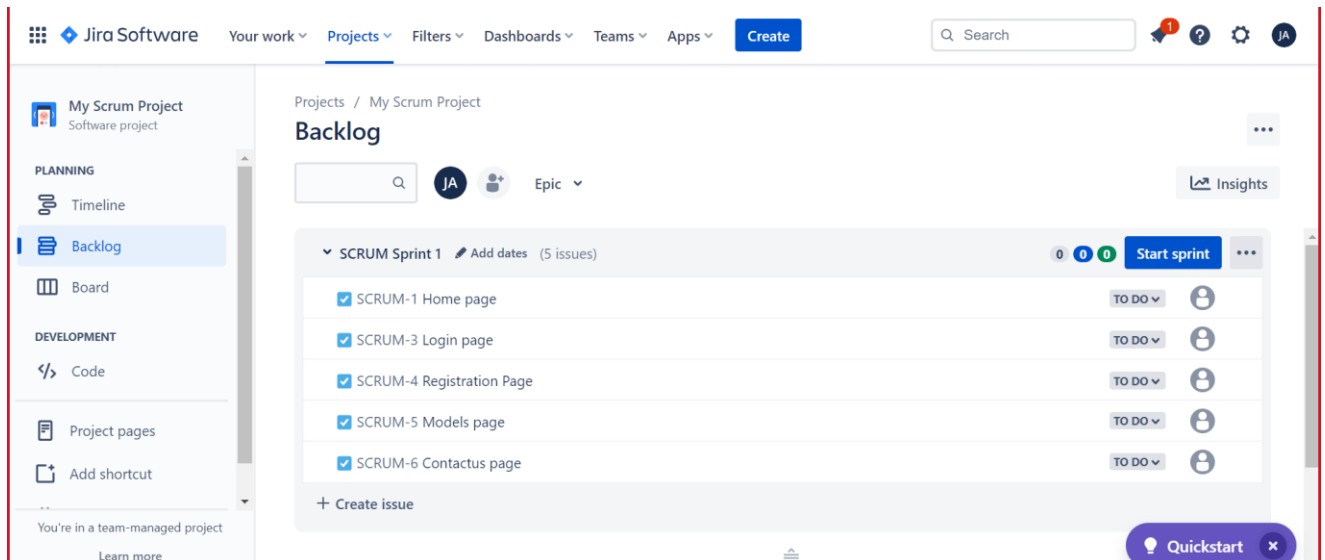

Below screenshot shows the template selection:

◇After the creation of project, You need to Add scrum names which the work you have to assign your team members.

In that You can add issues, sub modules and assign the tasks to your team members by through their mail id'

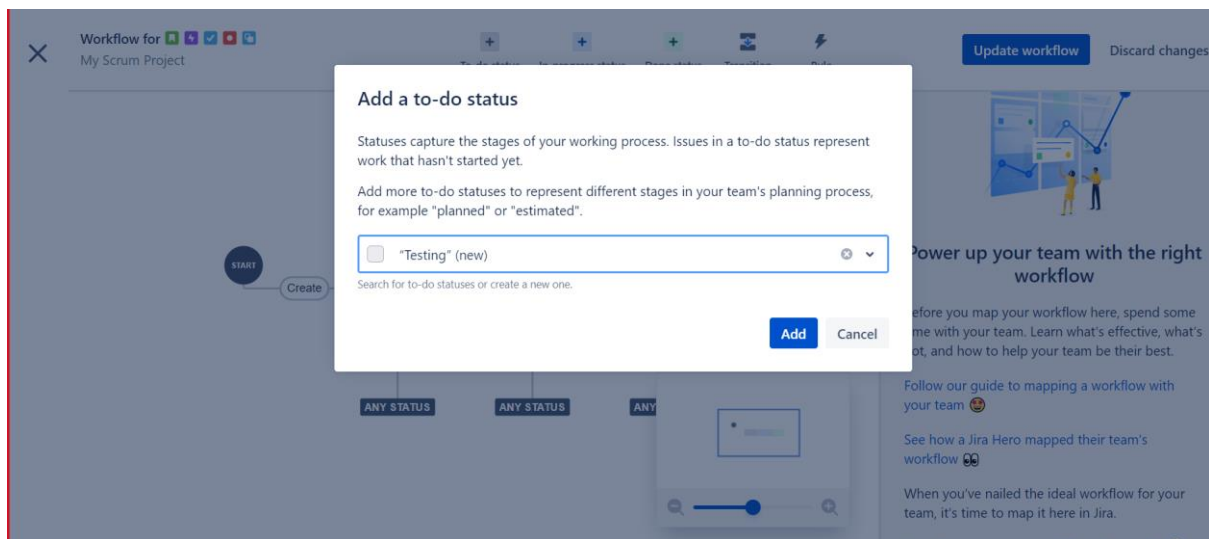

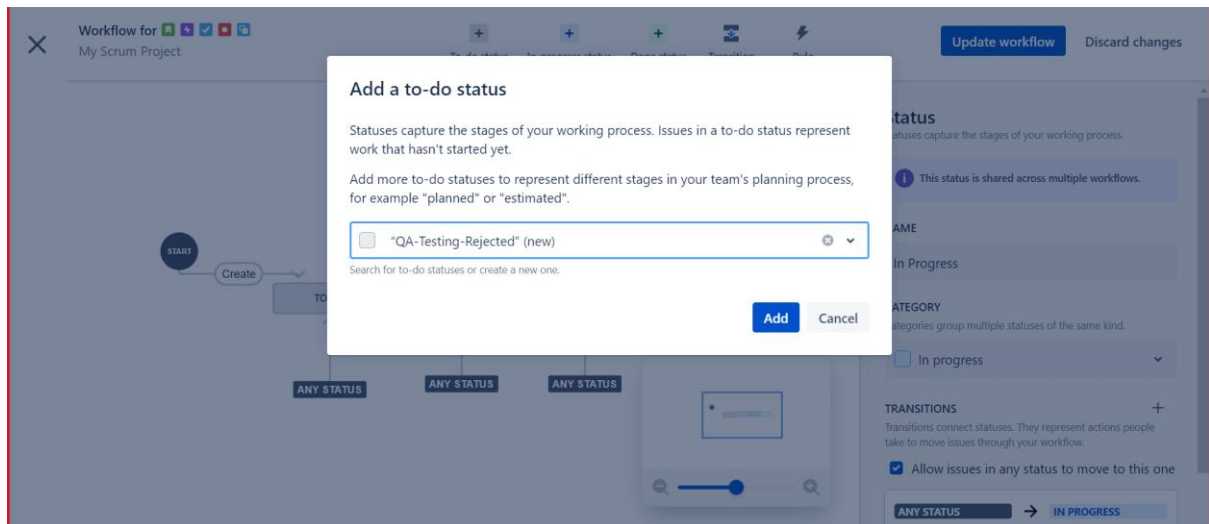

## CREATE WORKFLOW:

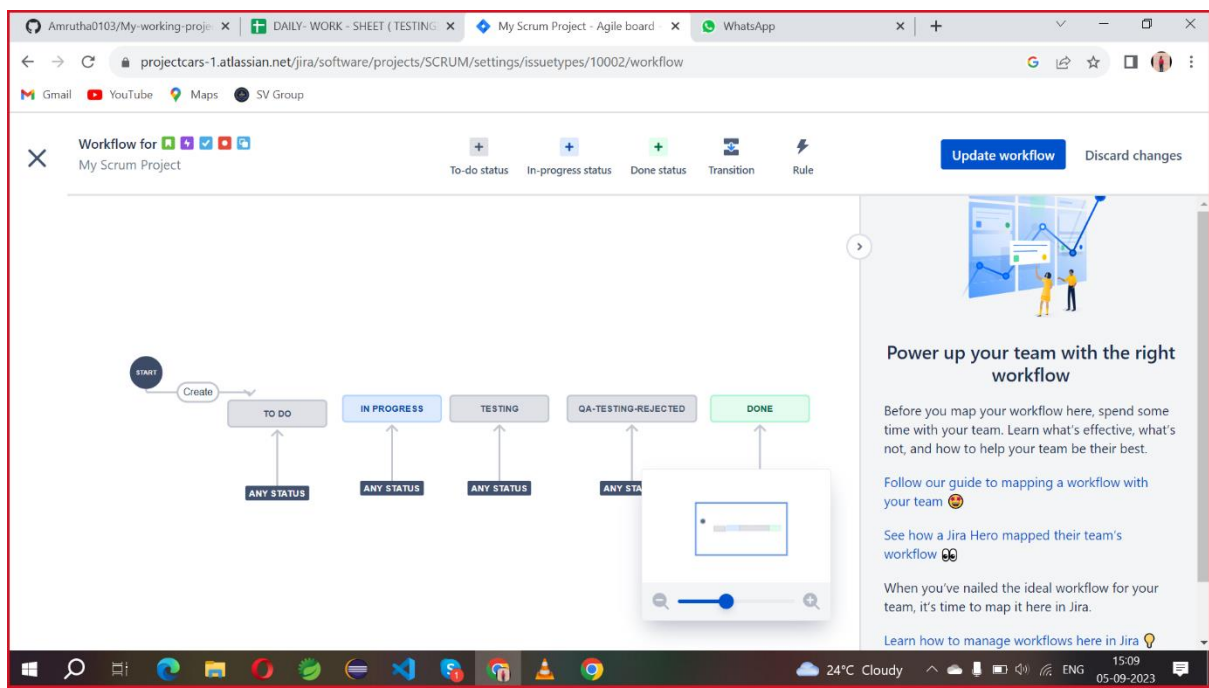

To create workflow, go to scrum module name, right side there is To Do option, click on that then click on workflow to create status

I have added Testing and QA-Testing-Rejected and then adjust your workflow sheet

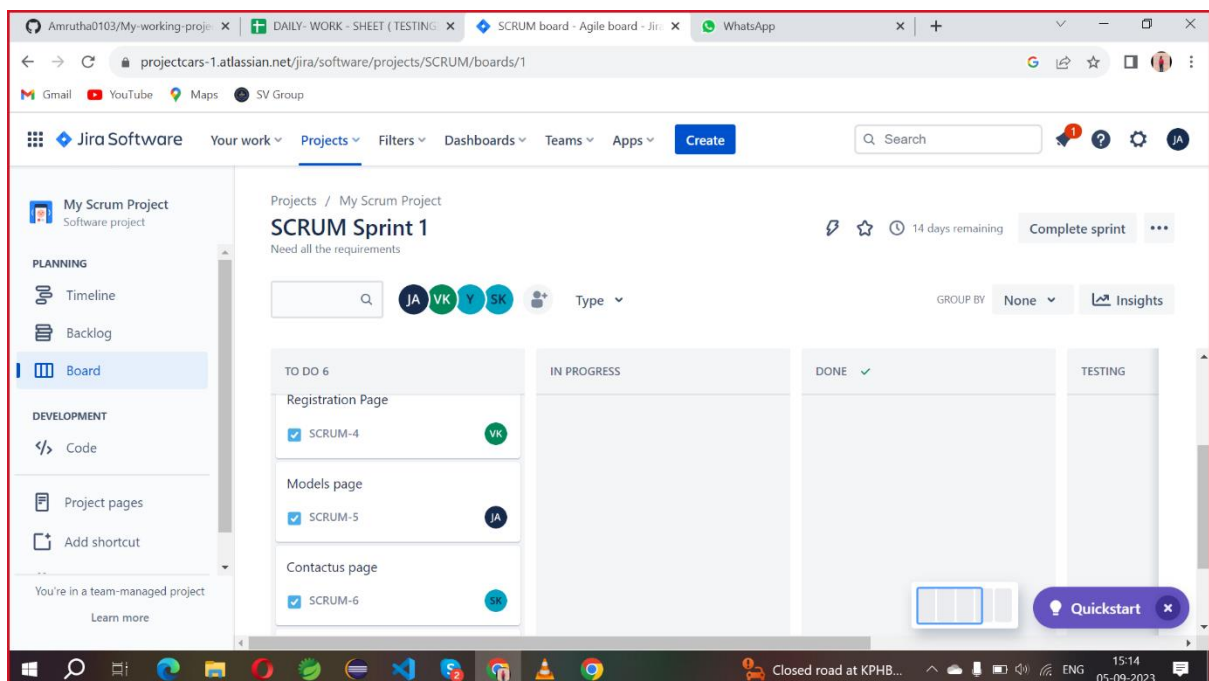

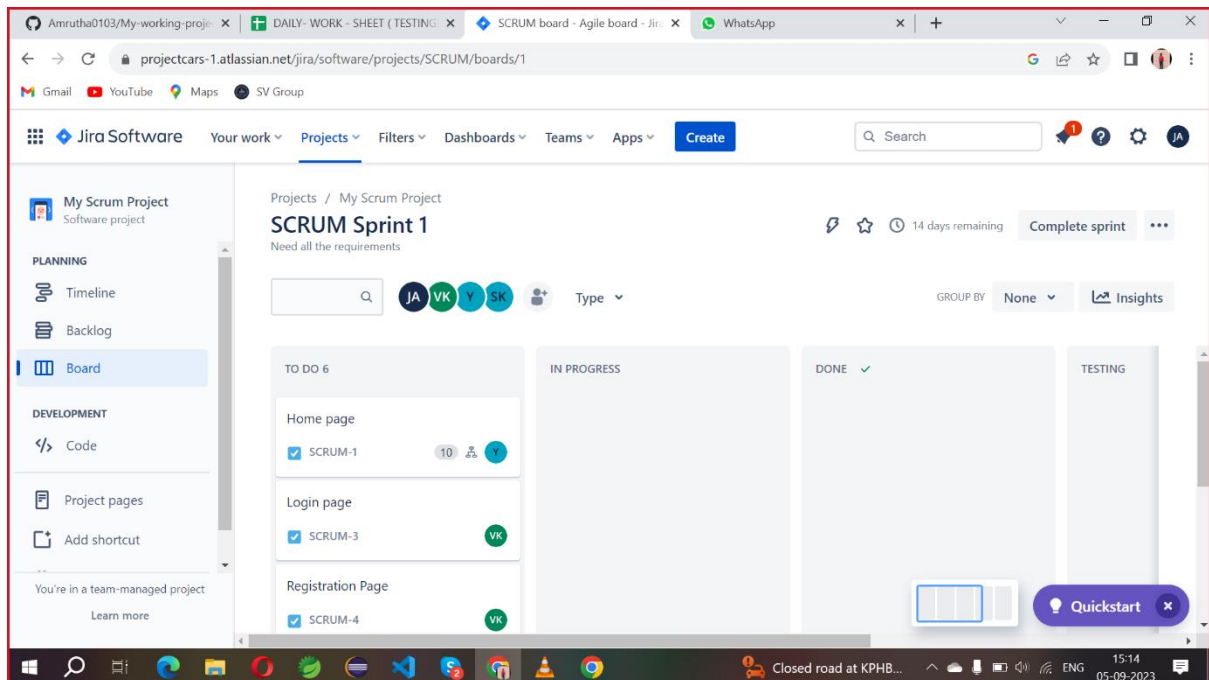

## Adjust workflow:

◇ Finally Start the sprint and adjust timings of work Then click save and continue then project should be created and you can also assign the work to your team members here

In the below screenshot I have created project and assigned work to my team members.

This is the timeline assigned:

The screenshot displays the Jira Software interface for a project named 'My Scrum Project'. The browser address bar shows the URL: `projectcars-1.atlassian.net/jira/software/projects/SCRUM/boards/1/timeline`. The Jira navigation bar includes links for 'Your work', 'Projects', 'Filters', 'Dashboards', 'Teams', and 'Apps', along with a 'Create' button and a search bar. The left sidebar lists project navigation options: 'My Scrum Project' (Software project), 'PLANNING' (Timeline, Backlog, Board), 'DEVELOPMENT' (Code), 'Project pages', and 'Add shortcut'. The main content area is titled 'Timeline' and shows a monthly view for September and October. A 'SCRUM Sprint 1' is visible, spanning from the start of September to the end of September. A task card titled 'What needs to be done?' is positioned within the sprint. The bottom of the screen shows a Windows taskbar with various application icons and a system tray indicating the time as 16:16 on 05-09-2023.
